PROFILE

A highly-driven and versatile assistant to senior leadership in the virtual reality game production industry, seeking opportunities to grow my software engineering experience whilst working towards my Master's degree. Extensive experience fostering communication and coordination between multiple creative teams to build relationships and achieve production goals. Able to proactively identify and solve problems in varying aspects of product development.

EXPERIENCE

EXECUTIVE ASSISTANT

FUN TRAIN VR | REMOTE | JULY 2021 - PRESENT

Providing direct support to executive leadership throughout the development and lifecycle of multiple virtual reality products.

- Organizing issue tracking and project tracking for four major virtual reality titles
- Supporting and coordinating with development teams, marketing teams, art teams, QA teams, accounting staff, legal staff, and platform partners
- Maintaining and utilizing Steam, Oculus, & Playstation backend platform toolsets
- Strengthening community engagement through Discord and social media
- Implementing analytics tools to accurately measure success
- Spearheading playtesting, and competitive game research
- Streamlining calendar management & scheduling company-wide
- Creating operational documents (data summarization spreadsheets, digital marketing campaigns, press releases, and meeting documentation)

SYSTEMS ANALYSIS & SOFTWARE ENGINEERING TEACHING ASST.

COASTAL CAROLINA UNIVERSITY | CONWAY, SC | JULY 2019 - JANUARY 2020

- Tutored students in Systems Analysis and Software Engineering courses
- Accelerated comprehension by offering learners pair-programming sessions
- Reviewed and critiqued course assignments to strengthen comprehension
